

HGE20X20

| Horizontal Electrophoresis

Details Info

Features:

HGE20X20 unit accommodates standard gels for both analytical and preparative studies of nucleic acids. It is ideal for a wide range of samples including DNA and RNA agarose gel electrophoresis.

Specification:

Gel Size	200×200mm
Sample volume	22, 44.
Buffer Volume	1700ml.
Abundant buffer not only guarantees cooling effects, but also keeps the pH Value stable during the whole experimental process. Unfolded electrodes make repair and parts replacement easy and quick.	
The transparent top lid effectively prevents the liquid in the cell from volatilizing and avoids electricity leakage.Auto-switch-off when the lid is removed.
