

VGE10X10D Mini-Protean Electrophoresis Cell

| Vertical- Electrophoresis

☰ Details Info

Features:

VGE10X10D is intended for protein electrophoresis. By using the latest injection molding manufacturing techniques a high quality, low cost product with unsurpassed finish, durability and strength is provided.

Specification:

Glass plate size	100×100mm.
Gel size	82×88mm
Sample volume	11, 15
Buffer Volume	750ml
Auto-switch-off when the lid is removed
