

MIR-Series

| Medical Incinerator

☰ Details Info

Specifications:

It is suitable for the health sector, farm, blood station, epidemic prevention station, surgical waste in hospital and viral

Product Description:

It is suitable for the health sector, farm, blood station, epidemic prevention station, surgical waste in hospital and viral material.

Types of medical waste incinerated: disposable syringe, infusion set, cotton yarn, some materials used in the operating room , stump, rubber gloves, dumped protective clothing and sickbed supplies which are infectious and hazardous

Main features:

Italian fuel injection system Automatically control system, digital display

With the function of time set, automatically incinerate and ignite,Negative pressure burning,Use the diesel for fuel.

Can meet the requirements of the national environmental protection standard. Low failure rate, low maintenance and operating cost

Safety device:

Burner safety device: fuel supplies can be automatically cutted off ,when the burner ignition device is unnormal

Technical parameter:

Model	Capacity	Fuel	Ignition Mode	Power	Power Supply
MIR-10	10Kg/H	Diesel fuel	Automatically	700W	220V/50HZ
MIR -20	20Kg/H	Diesel fuel	Automatically	900W	220V/50HZ
MIR -30	30Kg/H	Diesel fuel	Automatically	1100W	220V/50HZ
MIR -50	50Kg/H	Diesel fuel	Automatically	1800W	220V/50HZ
MIR -100	100Kg/H	Diesel fuel	Automatically	2500W	220V/50HZ
MIR -200	200Kg/H	Diesel fuel	Automatically	3500W	220V/50HZ

Basic Configuration:

Furnace: 1 set (steel furnace, refractories, insulation materials)

Dust collector: 1 set

Exhaust pipe: 1 set

Oil Pump: 1 unit

Fan: 1 set

Italian importing fuel injection system: 1 set

Carbon steel storage tank: 1 unit

Carbon steel chimney: 1 set

Carbon steel flue: 1 set

Automatically control system: 1 set

Safety equipment: 1 set (including the burner safety devices, lightning protection safety devices, etc.)
