

## AHS62 - Automatic Immuno-Histo Stainer

| STAINER

Details Info

### Features:

Program can be changed at any time required and can be made according to the user's requirement characteristics

More than one hundred programs can be made for standardized immunostainer and rapid special staining

One computer can control several immuno-Histo Stainers simultaneously.

To ensure the continuity and completeness of an experimental running, an external power supply can be provided.

Such running conditions as running time and running progress can be clearly monitored at any time

The standardization of the test method of immunostainer is becoming more and more important with the wide use of the immunostainer technology in the modern pathologic diagnosis because it has a bearing on the prognosis and treatment of the patient

AHS62 immunohistochemistry stainer adopts European advanced technology with intelligent program interface which is easy to understand and operate, thus providing a scientific and reliable platform for the standardization of the test method of immunostainer.

Open the system, suitable for reagents of different

Suitable for various kinds of specimen; paraffin, refrigerated and punctured microtome sections, cell smear and marrow microtome section

Precise micro dropping rates of reagent adjustable to the minimum of 50ul, thus saving expensive reagent

Different dropping rates of antibody can be set for different tissue section.

Excellent overall sealing keeps the inside environment wet.

Contents are under the protection of secret code

The dropper point surface is Teflon treated and can be thoroughly cleaned to avoid cross contamination.

Movable scavenging gentle air blows off the liquid residue on the tissue sections.

### Technical parameters:

Capacity	48 microtom section and 64 kinds of reagents
Reagent titer increment	50ul ,75ul ,100ul, 150ul, 200ul, 250ul
Outside dimensions(WXDXH)	1015X665X520 mm
Power supply	±10% at 50/60HZ or 110V±10% at 50/60HZ
Nominal power	350W
Weight	About 116 kg
